Project Description of Work:

The Project consists of improvements to Union County's existing Supervisory Control and Data Acquisition (SCADA) system. The work as indicated in the project documents consists of all materials, labor, tools, equipment, apparatus, facilities, transportation and incidentals necessary to construct, furnish, deliver and install the following in general:

1. Replace existing Data Flow Systems (DFS) telemetry system and RTUs installed throughout the county drinking water distribution, wastewater treatment, and sewer collection facilities with new cellular telemetry system and new programmable logic controller (PLC) based RTUs.
2. Replace electrical equipment including power distribution and motor starters / local control panels at select facilities identified throughout the county with new equipment.
3. Install new equipment pads, racks, and shelters at select facilities identified throughout the county.
4. Configure, test, and commission PLC based RTUs at each facility.
5. Modify existing central VTScada application to transfer data connection from DFS telemetry system to the new telemetry system.
6. Configure, test, and commission existing Tier-2 historical data storage.

Bids will be received for a single prime Contract. Bids shall be on a lump sum and unit price basis, with additive alternate bid items as indicated in the Bid Form. The Engineer's Estimate for the Union County SCADA Telemetry System and RTU Replacement project is \$8,400,000. The Project has an expected duration of 1,043 days.
